MOSAIC

COLOUR STUDIO

Client colour selection booklet

APRIL 2026

Congratulations on selecting your new home! Now, let's get ready for your MOSAIC Colour Studio appointment. Discover your style by visiting our display homes or meeting our trade suppliers.

Seeking inspiration? Online platforms like Pinterest and Instagram are perfect for this. Create a digital mood board of your favourites!

You'll be handpicking each detail during your appointment so, the more you prepare, the more enjoyable and stress-free it will be!

Dive into design and let's make your home truly yours.

Need more inspiration?

Use the QR codes to view our dedicated resources to give you an idea of what's possible.

VIRTUAL TOURS will show you various display homes and examples of previous builds.

ONLINE COLOUR STUDIO is a catalogue of all the elements that will go into your home build, giving you a comprehensive list of everything that you can customise in your new home.

ONLINE COLOUR STUDIO

VIRTURAL TOURS

One

Utilise the online colour selection booklet to make your initial selections for basins, taps, fixtures and door furniture. Feel welcome to visit our suppliers, especially Austral to see your brick selection on a larger scale.

Two

We encourage you to attend the MOSAIC colour studio for an information session, take the opportunity to have an initial conversation with our interior design team and take a look at our upgrade and colour selections.

Three

Attend your appointment! You will meet with your MOSAIC Interior Designer who will guide you through making the following choices and help you piece together your new dream home!

Four

The team will prepare a final statement of your selections. If you've chosen any upgrades, a quote will be prepared and sent to you within a week of your appointment.

Five

After you have made your colour selections, you will meet with our electrical consultant to finalise the electrical plan for your home. Pricing for your selections will be provided to you on the spot as a variation to your new home contract.

Some things to note

- Please allow the following uninterrupted block of time for your MOSAIC Colour Studio appointment:
  Single story home: 4 hours (lunch will be provided for two people as part of this appointment)
  Double Story Home: 6 hours (lunch will be provided for two people as part of this appointment)
- All of your electrical selections will be completed by our electrical consultant at a separate appointment and pricing will be provided to you as a variation to your new home contract.
- Unfortunately, the MOSAIC Colour Studio is not equipped to accommodate children. To ensure you are able to focus your attention on making important decisions, and in consideration of other groups in MOSAIC who are trying to do the same, we ask that you make alternative arrangements for your children on the day of your appointment.

Getting Ready for Your Appointment

Embarking on the journey to build your new home is both exciting and inspiring. It's a wonderful opportunity to bring together your dreams and ideas to create your perfect living space. To help you prepare for your appointment and make your final selections, here are some helpful tips:

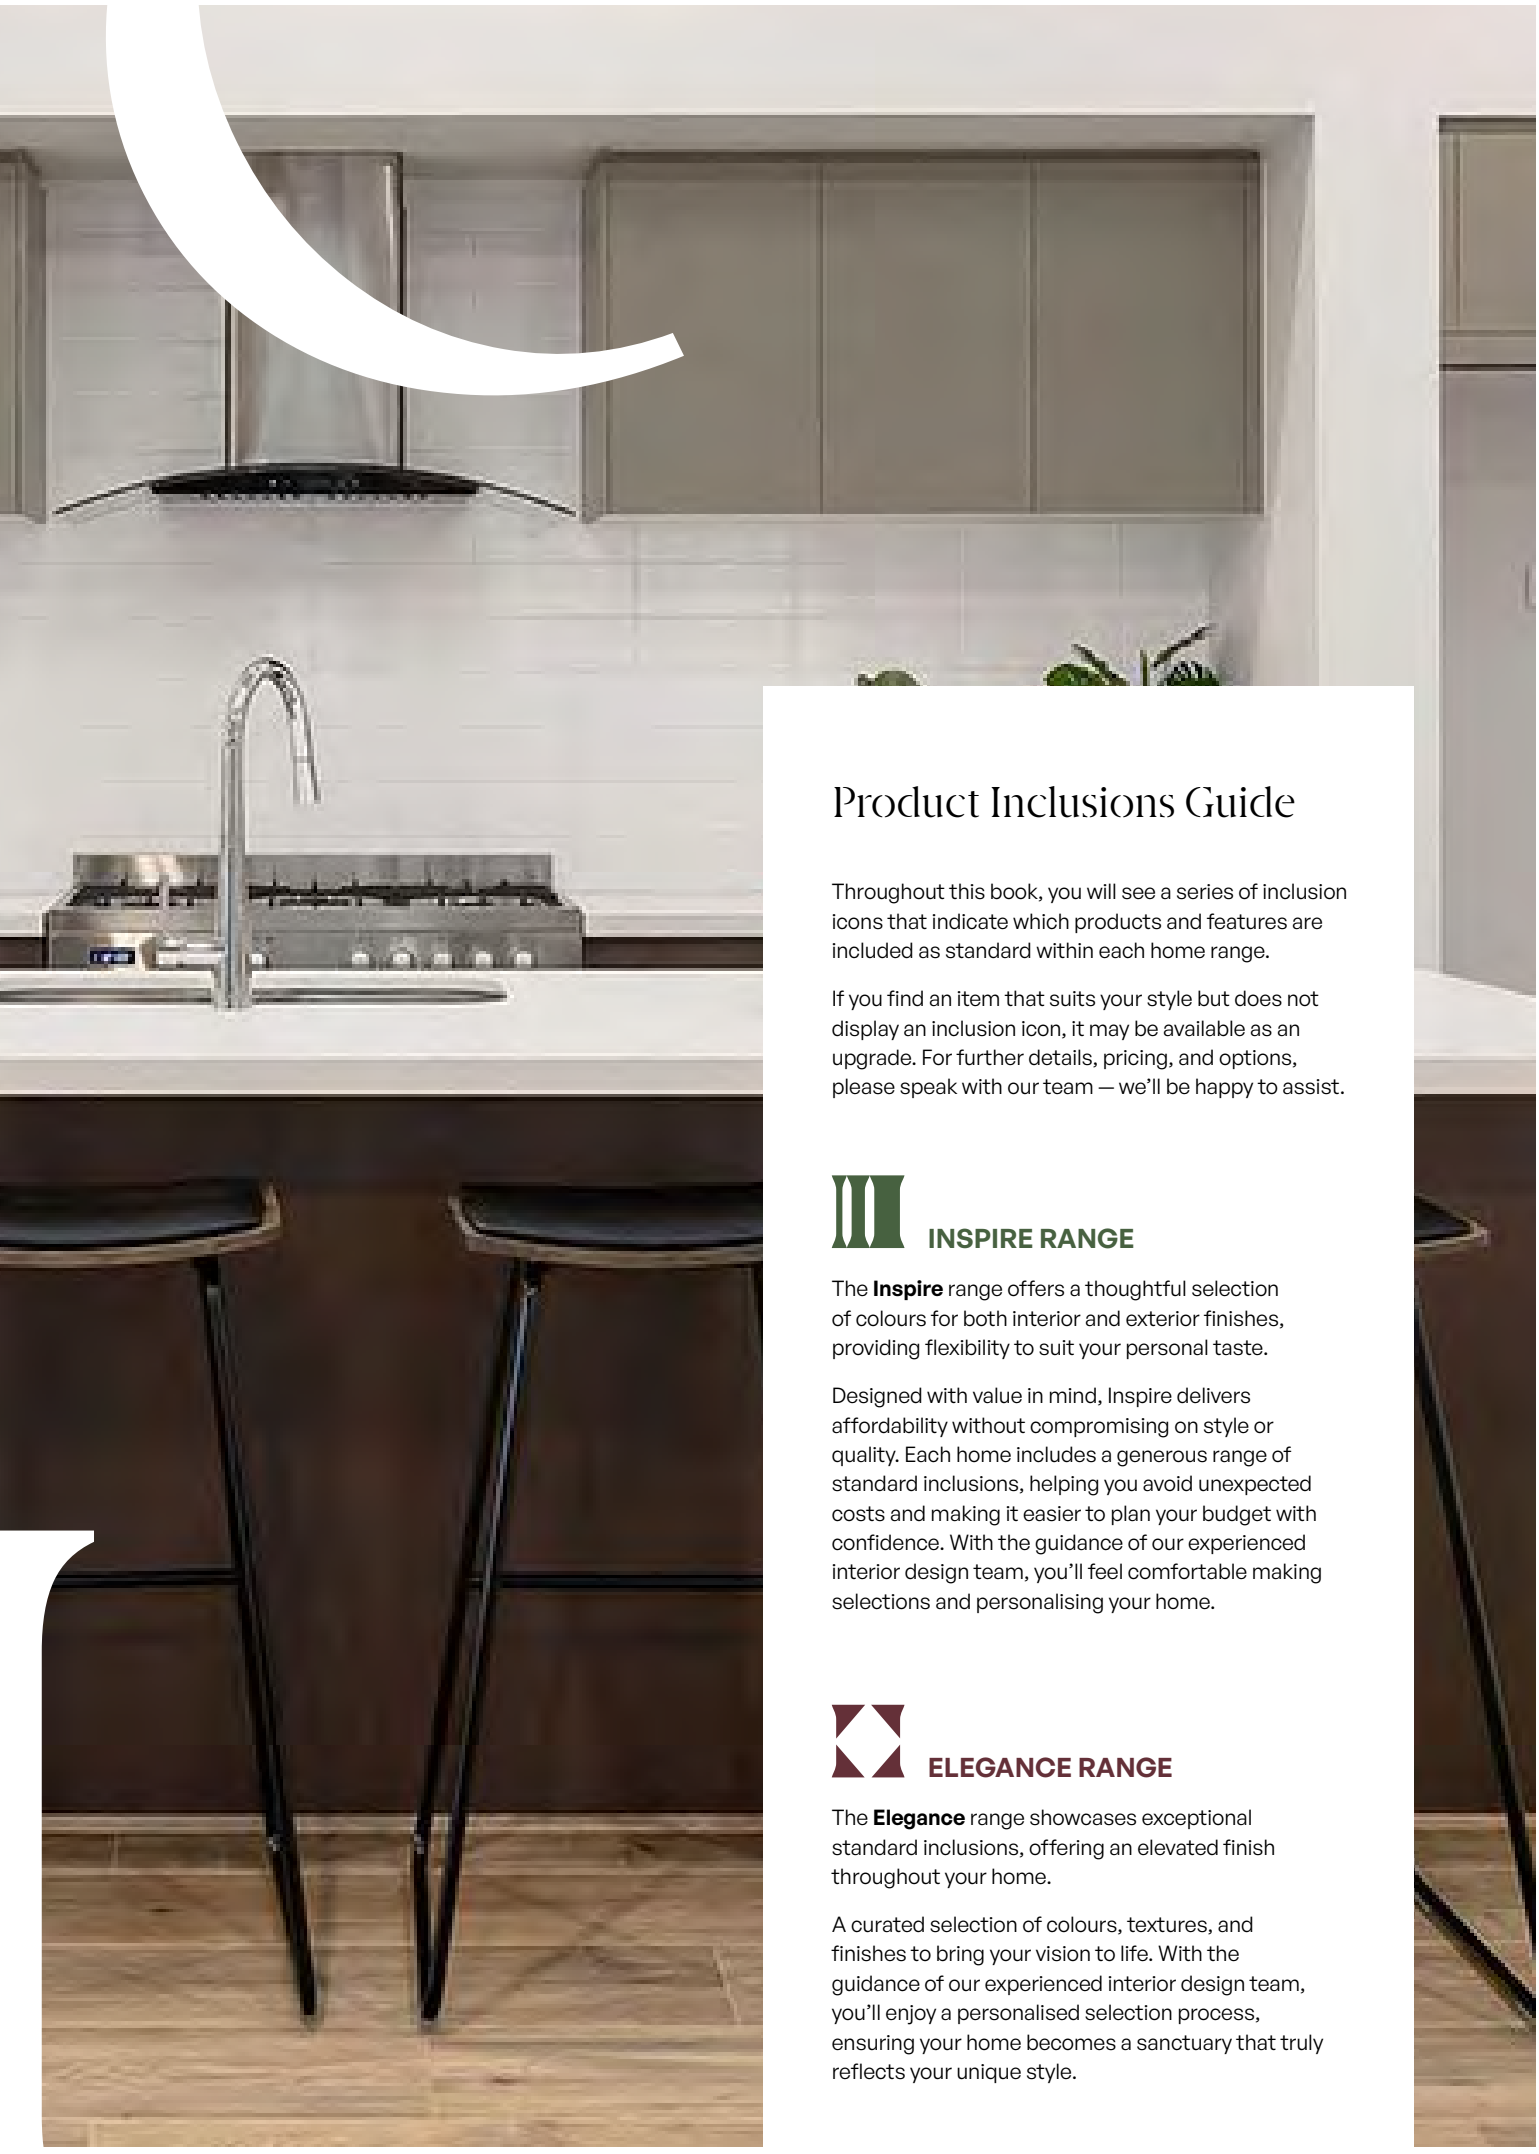

- Create a scrapbook to collect all your favourite images for easy reference.
- Explore several display homes to see which finishes resonate with you the most.
- Browse Kingsbridge display homes to find facade options and internal colours that you love and save your favourites.
- Bring along your Kingsbridge Sales Quote to keep track of your selected choices.
- Keep in mind any developer or land estate guidelines that might influence your colour and product selections.
- You'll find a list of suppliers and retailers in this guide if you'd like to gather more product information.
- Being well-prepared will enhance your experience and help you make the most of the numerous choices available to you.

Kingsbridge Homes reserves the right to change package details, prices or substitute the make, model and/or type of any of the above products, specifications, inclusions or promotion without notice or obligation. Images are for illustrative purposes only and may not represent standard inclusions. Please refer to final contract documents and final working drawings for exact details. E&OE. Kingsbridge Homes. This information is indicative only and may vary without notice. Furniture or vehicles are not included in the sale of the lot. Images are artist's impressions only.

Product Inclusions Guide

Throughout this book, you will see a series of inclusion icons that indicate which products and features are included as standard within each home range.

If you find an item that suits your style but does not display an inclusion icon, it may be available as an upgrade. For further details, pricing, and options, please speak with our team — we'll be happy to assist.

INSPIRE RANGE

The **Inspire** range offers a thoughtful selection of colours for both interior and exterior finishes, providing flexibility to suit your personal taste.

Designed with value in mind, Inspire delivers affordability without compromising on style or quality. Each home includes a generous range of standard inclusions, helping you avoid unexpected costs and making it easier to plan your budget with confidence. With the guidance of our experienced interior design team, you'll feel comfortable making selections and personalising your home.

ELEGANCE RANGE

The **Elegance** range showcases exceptional standard inclusions, offering an elevated finish throughout your home.

A curated selection of colours, textures, and finishes to bring your vision to life. With the guidance of our experienced interior design team, you'll enjoy a personalised selection process, ensuring your home becomes a sanctuary that truly reflects your unique style.

Bricks

Bricks

The exterior charm of your home begins with your choice of brick, setting the tone every time you drive up to your new home. Choose a brick that reflects your personal style while also meeting any design guidelines specified in your land contract, if applicable.

Bricks are a natural product, so colour variations can occur between batches, and colours may appear different on a full wall compared to the sample shown in the Mosaic studio. To get a more accurate sense of the final look, we recommend visiting your nearest Austral Bricks display centre prior to your colour appointment to view bricks on a larger scale and with the two mortar colour options

Mortar finishes

Austral Bricks

Mortar not only holds your bricks together but also influences the overall appearance of your home, making it important to choose a shade that complements your brickwork. Kingsbridge Homes offers natural or off white mortar in a rolled finish.

Once you've chosen your face brick and any feature brick (if applicable), you'll decide on the mortar colour and finish. Please note that natural finishes may vary in colour between homes and can develop subtle changes over time.

Daniel Robertson Range - Traditional Red

Colorbond® roof, fascia and gutters

Colorbond®

With its tough, baked-on paint finish, Colorbond® steel is built to resist chipping, peeling, and cracking, ensuring lasting performance with minimal upkeep. This non-combustible, termite-resistant material provides weatherproof and secure protection, making it ideal for withstanding Australia's challenging conditions.

Colorbond® options are standard for fascia, downpipe and gutters. A Colorbond® roof is not a standard or included product for either Inspire or Elegance.

Roof tiles

How to Choose a Roof Tile Profile

Monier roof tiles

A tile's profile refers to its shape and design. Monier roof tile profiles range from smooth flat tiles to prominent undulations or waves on the surface of the tile.

Key considerations when choosing a tile profile will be the pitch of your roof as well as its style. Below is a chart to help you choose a profile for your tiles.

You will need to find out the pitch of your roof when selecting a profile as some tiles require a minimum pitch.

Images are for illustrative purposes only and may not represent standard inclusions. Please refer to your Kingsbridge representative for further details.

Concrete Tiles

Monier roof tiles

The roof is usually the largest surface area of a house and materials selection will impact both performance and aesthetic longevity.

Modern concrete tiles are made from sand and cement with a pigmented colour coat. This can replicate the appearance of a broad array of distinctive tile designs, while remaining relatively cost-effective.

External sliding doors

Double glazed sliding doors

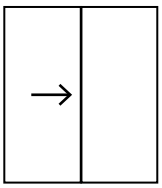

Aluminium sliding doors are a great option for opening up your home to the outdoors without losing valuable space on the inside or out.

Our aluminium sliding doors are available in a wide range of styles and configurations, including:

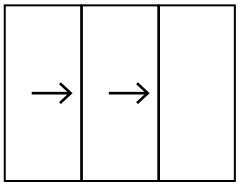

- Standard Sliding Door Range, with 2 panels for smaller openings.
- Entertainer or Stacker Sliding Door Range, with 3 or more panels.
- Bi-Parting Sliding Door Range, with 4 or more panels, opening from the centre.
- Corner Sliding Door Range, with multiple panels opening from a corner, with no corner post for the ultimate alfresco area.

Designed for a sleek, modern finish, our sliding doors are a great solution for both visual impact and practicality.

Hume Doors

What is PCM Painted?

On Hume internal doors, 'PCM' stands for 'Pre-primed Clear MDF'.

This indicates that the door is made from Medium Density Fiberboard (MDF) and has been pre-primed with a clear coat, which makes it ready for painting the Wattyl colour of your choice.

Square Set Plaster

Square set plaster uses no cornice, instead battens the ceiling with lasered battens to ensure the straightest edge possible where the ceiling plaster meets the wall plaster. The edge is finished with a special finishing trim that leaves a 90 degree angle. This look is modern and creates the angular straight lines many designers desire. This treatment can be implemented within all rooms or in compartments such as large living areas.

Carpet

Fibre Types

Flooring Xtra

NATURAL WOOL AND WOOLRICH

Wool carpet is the ultimate statement of style and success. Being a natural product, wool just feels better. It provides warmth during those cold winter months and has natural insulating properties. It is also naturally fire resistant. Wool is kind to the environment as it is sustainably sourced, is a renewable resource and is also biodegradable.

SOLUTION DYED NYLON

Solution dyed nylon carpets have superior anti–stain characteristics, are extremely fade resistant and the piles do not shed, which mean most manufacturers back them with extensive warranties. Anti – static features are common in most solution dyed carpets, and yarn memory ensures cut pile fibres hold their twist and appearance for longer.

PET POLYESTER CARPETS

These carpets use recycled plastics – plastic bottles, making better use of our natural resources. The fibre tends to have deeper and richer colour holding its appearance for longer. It also has a luxurious handle and is resistant to water soluble stains. The yarn is great for asthma sufferers.

FLOORING XTRA

Images are for illustrative purposes only and may not represent standard inclusions. Please refer to your Kingsbridge representative for further details.

LOOP PILE

A resilient, durable carpet for high traffic areas, the loop pile yarn adds considerable strength and resistance. Loop pile carpets with an even height provide a tidy, linear style perfect for a modern interior. Loop pile carpets are easy care as they don't show footprints and hide soil and dirt well.

LOOP PILE (TEXTURED)

A loop carpet with a multilevel loop has a sculptured look, achieved with loops at different heights. Textural loop patterns are achieved by varying the height and weight of each loop.

CUT PILE (TWIST)

A cut pile carpet can add a soft, comfortable finish to an interior space. Perfect for bedrooms and living rooms. Cut piles can move and cause light to reflect differently in different places. This effect is known as shading.

COMBINATION CUT AND LOOP PILE

These carpets generally consist of a clever combination of cut pile and loop pile – designed in a distinctive pattern. This type of carpet can create different effects in the interior of a home. Consideration needs to be taken when installing a combination carpet with a directional pattern (e.g. a horizontal repeat vs. a vertical repeat), as the direction of the pattern may effect the viewers appreciation of the space. The combination cut and loop gives a sophisticated, soft yet defined look, great for formal spaces (e.g. a guest lounge or formal dining room).

PLUSH CUT PILE

A plush cut pile carpet features dense and slightly twisted yarns that stand upright to form an even surface. This carpet type provides a feeling of luxury, with a smooth, level height and velour finish. Dense plush carpet creates a feeling of relaxation that's perfect for the bedroom.

Tiles

Minta Farm Estate - Silverstone 29

Beaumont Tiles

They're one of the most practical materials ever made and have proven their durability and beauty over thousands of years. The Romans used ceramics to create magnificent decorative effects in their palaces and public areas. Floors tiled in ancient Rome are still in use today. Tiles are used across the entire home; bathrooms, kitchens and laundries, bedrooms, walls and outdoors. With new manufacturing methods like digital printing and large format cutting, there are tiles for every style, design and space – up or down, in or out.

A GREAT INVESTMENT WITH A GUARANTEE

For such an economical choice, tiles are a great long term investment. With careful selection you'll enhance your home and add to its capital value. At Beaumont's all our first grade tiles are guaranteed for 10 years.

GREAT FOR ALLERGIES

Tiles are an incredible solution for people who suffer allergies and asthma. Plus they're easy to keep clean, even with natural products.

BEAUMONT TILES
Looking good!

At Beaumont's we'd rather lose a sale than sell the wrong ones.

And while most tilers know their trade, they may not be up with the latest technical developments, so if your tiler tells you something different to what your tiler merchant has said – get another opinion.

SLIP RESISTANCE

Most flooring can become slippery when wet. Surface dust can also contribute to this. Floor mats can help as can tiles with a skid resistant surface. Remember 'tho a rougher surface will take a little more effort to clean.

TILING FOR COOLER CLIMATES

Under floor heating is energy and cost efficient and perfect for those chillier mornings and nights. This does need to be installed at the very start of your tiling project.

Images are for illustrative purposes only and may not represent standard inclusions. Please refer to your Kingsbridge representative for further details.

Floor and wall tiles

Tiles come in a variety of sizes and finishes, matt, silk, shine, microtec and textured. The maximum size tile that we will lay is 600x600mm.

WALL TILES

The good news is that pretty much any size and finish tile can go on a wall.
The important information to remember is that you cannot do the same for the floor.

FLOOR TILES

Floor tiles can be identified by wear ratings 1-5. When thinking about which tile to use on your floor, you also need to consider if it's being used in a wet area or high pedestrian area such as a hallway.

RECTIFIED AND NON RECTIFIED TILES

A rectified tile has a precise square cut edge, this gives the final product a sharp clean appearance. A non- rectified tile has a slightly round or 'cushion like' edge, these can vary slightly in a final measurement and also the size of the grout lines.

Grout

Tile grout is the filler for the joints around the tile,

If your tiles are all about shape, tile layout, or size, your grout should accentuate these features. In most cases using a grout colour that blends with your tile is on trend.

Laminex Nuance finish

Nuance finish uses physically embossed gloss and matte layers to recreate the effect of sandblasted straight woodgrain to add beauty and realism.

APPLICATIONS

It was designed to bring refined organic character to cabinetry and low-wear surfaces, and is available as high-pressure laminate, decorated board and compact laminate.

COLOURS

Nuance comes in a palette of decors from Laminex's Whites & Neutrals, Woodgrains and Accents ranges.

Upgrade

Bankside Estate - Welland

Laminex AbsoluteMatte

AbsoluteMatte is an ultra-matte, fingerprint-resistant surface with a luxurious look and silky-smooth feel.

APPLICATIONS

AbsoluteMatte HPL high-pressure laminate is suitable for horizontal applications such as benchtops, reception counters, desks and tables, while AbsoluteMatte Panels can be used vertically for cabinetry and wall cladding.

COLOURS

They are available in a diverse selection of colours, ideal for contemporary interiors, featuring timeless whites, a sleek ultra-matte black, and a variety of stylish neutrals.

The world's leading benchtop designs.

Caesarstone®

Caesarstone® surfaces meet exacting standards of excellence from the initial procurement of raw materials to the final quality control check. Highly skilled and trained staff members ensure the quality of a product that is unrivaled in the industry today.

The manufacturing process begins with a rigorous inspection of all incoming raw materials. These are blended at a ratio of up to ~90% natural quartz aggregates with pigments and polymer resins. Caesarstone® Quartz Surfaces are manufactured through a highly automated, yet strictly monitored process.

Caesarstone is consistently specified as the number 1 choice of brand for benchtops by Australia's leading architects and designers. They trust the product for its durability, its style and its timelessness. It's a reflection of the quality work they strive to deliver.

Benchtop options available in:

- 20mm square edge - *Standard in kitchen, bathrooms, ensuites, laundry and powder rooms (where applicable)*
- 40mm square edge - *Standard to kitchen*
- 60mm square edge - *Category 1*
- Water fall option to kitchen - *Category 1*

Shower screens

Touch of Glass

Standard Semi Framed Shower Screen

A semi framed shower screen provides a clearly defined shower recess and sleek, streamlined design that reduces the places where dirt and mould can build up. Gone are traditional screens with multiple crevices and soap traps. Our semi framed shower screens are easy to clean with rounded corners, providing an extra dimension of safety and contributing to the overall look and feel of any bathroom.

Available in Chrome (pictured)
Standard (Included)

☐ Bathroom ☐ Ensuite

Also available in Matte Black
Upgrade

☐ Bathroom ☐ Ensuite

Semi Frameless Shower Screen

A semi frameless shower screen offers the stability of a traditional shower screen with the simple elegance of a frameless glass panel. With slimline trims and the option of doors that swing both ways, these beautiful selections will appeal to developers, architects and homeowners with specific bathroom requirements.

Available in Chrome

Frameless Shower Screen

The seamless and contemporary silhouettes created by our frameless shower screens create light and provide a modern elegance that add value to any bathroom. A combination of a minimalist aesthetic, ease-of-use and low-maintenance makes these an ideal choice for any bathroom décor.

Also available as 10mm thick panels with no door.
