Pump Hot Water System

7 Star Home Energy
Rating Accreditation

Kingsbridge

**The parties acknowledge and agree that the "7 Star Energy Rating Promotion" is based on requirements specified in 2023 for a 7 star energy rating compliance for the Builder's standard house plans with standard ceilings heights. Additional charges may apply if the owner selects options or alterations to the standard house plan and/or increased ceiling height(s). Additional charges may also apply where the requirements for a 7 star energy rating change. Any additional charges will be calculated and forwarded onto the owner on completion of an energy rating of the home, which will be carried out after working drawings have been produced and the owner will be provided with a Building Variation for the increased costs. Valid for clients who sign a new home contract and pay their second deposit before 30/3/24 unless campaign concludes earlier at the discretion of the promoter.

Download our step by step guide taking you from contract to keys.

Providing you with a comprehensive overview of exactly what to expect at every stage of the home building journey.
